

Webster University Library Assistive Technology Policy

Assistive technology equipment is available to Eden and Webster faculty, staff, students and the general public.

Webster University Patrons:

Webster faculty, staff, and students should first contact the Academic Resource Center for information and training regarding the use of the assistive technology equipment and additional assistance that may be available. After the training/introduction by the Academic Resource Center, users may work with the equipment independently and ask a librarian for assistance with equipment as needed.

Eden Seminary and General Public Patrons:

Eden Seminary patrons and the general public can contact the Webster University Library Reference staff directly to access the assistive technology equipment. Librarians are available for a basic introduction to the equipment by appointment and troubleshooting of software as needed.

All Patrons:

- Passwords to access the adaptive technology equipment can be requested at the Reference Desk on the second floor of the library.
- Equipment is not permitted to leave the library.
- Patrons must provide their own flash drives for saving documents created with library software. A printer is available in the adaptive services alcove.
- We ask that users not save documents on the computer's hard drive.
