

THIS MORNING...Wednesday, May 6, at 9:30 in the Loretto-Hilton Center at the main stage, there will be a STRIKE INFORMATION CONVENTION to verbalize our rationale and purposes for today.

Members of the faculty will address the assembly on issues that we feel are necessary to be discussed before we can honestly and effectively work;

Sister Barbara Barbato...the history of Southeast Asia  
Jerome Perlinski...an analysis of the current government policy in Viet-Nam  
Michael Ward...a history of the strike movement in our country, and our rights as citizens to strike  
Robert Pelfrey...the idea of a strike as an effective and potentially creative force

If you are at all interested in what this day can accomplish, or if you are skeptical of the affirmative effects of this strike, please join us this morning, so that we may talk together.

This is a mandatory seminar for all those who are to actively participate in the strike. All those not so involved are strongly encouraged to participate in this event. If we are to be effective in the Webster community canvassing, we must be articulate and rational.

Assignments for those who have volunteered to canvass will be finalized after this session. Please check in the Web office at that time.

Thank you.

AND GOOD MORNING!!!
